

## Dare to Dream Big

The Custom Architectural Lighting Solutions team will collaborate with you to bring your unique vision to life. If you prefer to keep the best of the old, we are experts at replicating legacy luminaires or even restoring vintage fixtures to their original glory, utilizing today's technology.

## Custom Lighting

A custom lighting design begins with your inspiration. We assist by partnering with you to realize that inspiration to design a custom light for your project through the careful development of form, scale, materials and finishes, performance balanced to meet your budget. From there, our skilled craftsmen bring that vision to life.

## Historic Restoration

Historic restoration, replication and sympathetic reproduction are unique projects requiring a specialized skill set. Knowledge of older manufacturing techniques combined with modern technology, experience working with the vintage pieces and accomplished craftsmen are the essential ingredients for replicating, restoring or reproducing the original designs of yesteryear and preserving them for future generations.

## Modifications

The Acuity Brands Architectural standard products, Winona<sup>®</sup>, Peerless<sup>®</sup>, Mark Architectural Lighting<sup>™</sup>, Healthcare Lighting<sup>®</sup> and Hydrel<sup>®</sup>, can be modified to create signature luminaires for your application. By starting with standard architectural products, unique luminaires can be created for your project while saving both time and cost.
