

# Kwik products practically put themselves together.

Reduce labor & material costs on every electrical conduit job! In today's world the ability to value-engineer electrical conduit jobs to Save Time and Money are critical. With this in mind Columbia-MBF has developed several products which do exactly that: Save You Time and Money.

Columbia-MBF™ is part of Atkore International®, the premier supplier of Electrical Raceway Systems from source to outlet for the electrical industry. We are committed to working with the electrical industry to continue developing innovative solutions for all of your wiring needs.

In today's world, the ability to value engineer jobs to Save Time and Money are critical. With this in mind Columbia-MBF™ has developed several products which do exactly that: Save You Time and Money.

Columbia-MBF™ Kwik products are available in Electrical Metallic Tubing (EMT), and Galvanized Rigid Steel Conduit (GRC). Columbia-MBF™ utilizes an innovative and patented design which allows for a coupling or fitting to be an integral part of the conduit. This integral coupling/fitting allows installers to put together conduit systems quicker.

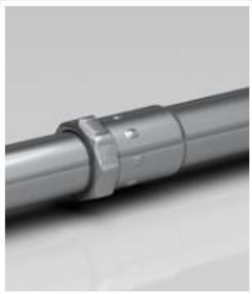

The following are raceway solutions available in the Kwik alternative.

ELECTRICAL METALLIC TUBING (EMT) RACEWAY	GALVANIZED RIGID STEEL CONDUIT (GRC) RACEWAY
Kwik-Fit EMT	Kwik-Couple GRC
Kwik-Fit Compression EMT	Kwik-Couple GRC Elbows

True Color™ Conduit made by Columbia-MBF™ allows you to quickly identify circuits. By adding a color to the top coat applied to our conduit, Columbia-MBF™ is able to provide distributors and installers with pre-colored raceways designed with specific circuits in mind. No more need to spend time painting Conduit in the field.

Over 60 years ago, Columbia-MBF™™ began changing and revolutionizing the steel conduit industry. Today, Columbia-MBF™ continues our commitment to the electrical industry by developing innovative Raceway Solutions. These innovative solutions along with our specially formulated interior and exterior coatings make Columbia-MBF™ the electrical conduit raceway manufacturer of choice for owners, specifiers, engineers, and distributors across North America.

For a complete list of Columbia-MBF™'s Specialty Conduit Solutions and how they can Save You Time and Money please browse our offerings and experience the benefits of Columbia-MBF™.

## Kwik-Fit® Compression EMT

All the benefits of E-Z Pull® EMT with an integrated coupling. This significantly reduces installation time, and eliminates the need to purchase inventory, and install separate couplings.

## Kwik-Couple® GRC

There are no separate couplings to purchase, store, carry or install. High grade durable and ductile steel for long life and corrosion resistant exterior and interior finishes.

## True Color™ EMT

True Color™ EMT is available in 8 vibrant colors to provide instant identification of multiple circuit systems.

## Kwik-Fit® EMT

Kwik-Fit® EMT is manufactured from high quality steel with a built-in set-screw coupling, eliminating the need to purchase inventory, and install separate couplings.

## Kwik-Couple® Elbows

Columbia-MBF™ offers the factory installed Kwik-Couple® for Galvanized Rigid Steel Conduit in 45°, 90° and 90° Large Radius Elbows.
