

Circuit-Lock[®] Motor Disconnects with Jog Switch

Hubbell Circuit-Lock[®] Motor Disconnects with integral jog switch are designed to withstand harsh environments with exposure to water, chemicals, oils and frequent wash downs. Enclosures are UL Listed, Type 4X, 12 and IP69k and available in non-metallic or stainless steel.

The Three Position Jog Switch Provides Users:

- Cost Savings by utilizing existing space in the motor disconnect enclosure reducing parts and labor costs.
- Convenience by having point of use control circuit to PLC within line of sight of the motor
- Added Safety by allowing maintenance personnel the functionality to "Try Out" after LO/TO
