TPC WIRE & CABLE CORP.
EXPECT HIGH PERFORMANCE®

Ethernet Cable Assemblies

TPC's Ethernet Cable Assemblies are designed with over a dozen different head configurations and are built to your specific needs using our superior Trex-Onics® brand Ethernet cables.

Our Trex-Onics® Industrial Ethernet CAT5E / 2-Pair Cable can be used in your Ethernet systems where a more robust cable is required. This UL approved cable is specifically designed for industrial applications where flexing and repetitive motion exists. Built for performance, our Trex-Onics® Industrial Ethernet CAT6A features a halogen-free, flame retardant jacket that provides superior protection from environmental abuse and offers resistance to UV light, cutting, abrasion, oil and chemicals. The classic-designed Trex-Onics® Industrial Ethernet CAT7A cable includes finely stranded conductors that provide high flexibility and a longer flex-life and a combination of cellular insulation and shielded pairs. The Ultra-Shield™ configuration and shield construction placed around each pair reduces radiated and conducted electrical noise interference.

Our Ethernet Cable Assemblies will outlast the competition and save you money by avoiding repairs reducing downtime.

TPC's Ethernet Cable Assemblies are designed with more than a dozen different head configurations and are built to your specific needs using our superior Trex-Onics brand Ethernet cables. FEATURES:

- Patch cable straight through pinout is standard.
- Crossover pinout available upon request.
- Shipped with standard strain relief boot.
- Molded strain relief available upon request.
- M12 Threaded Couplers.
- Molded for abusive applications.
- IP68 and NEMA 6P.
- Mechanical Connectors also available upon request.
