FactoryTalk Historian

Topic

FactoryTalk VantagePoint
Web Reporting for Manufacturing

8 AM

Review of the FREE TOOLS available to make Buying and Specifying Automation Products Easier, Avoid Costly Design Errors, Design Verification Wizards, Sample Code, Reduce Budgetary "What If" times and Help choosing the right Technology for your application. **DVD included**

9 AM

FactoryTalk Historian and VantagePoint — Come see this product in action for yourself first hand to understand why it is being so widely adopted into many critical applications today. Easy to design, configure and web deploy right out of the box. **Receive a 30 day trial version just for attending**

10 AM

EtherNet/IP (ODVA) - Come learn why EtherNet/IP has quickly become the most widely specified network by Automation Designers and the Network of choice by major Automation Manufacturers. The Control and Information Protocol (CIP) not only provides openness between CIP Networks but device Vendors as well. Relieve your Network Constraints by exploring this topic.

11 AM

Intelligent Motor Control (IMC) - Update of the latest technology offering in Low/Med Voltage VFD's, Solid State Starters & Intelligent MCC's with 600Volt Embedded EtherNet/IP, Intelligent Overloads and Energy Monitors. Revisit the TOOLS available for interfacing with these devices as well.

Lunch - Open Forum Discussions & TEST Drives
