

Electrozad Supply Commitment to Quality

Electrozad Supply has been ISO 9002:1994 registered with KPMG and BSI since 1999 for our Quality Management Program. In June 2003, we began merging our ISO 9002 Quality Program to comply with the ISO 9001:2000 Standard Guidelines.

We are committed to a strong Quality Management Program and with the implementation of ISO 9001:2000 Guidelines to provide the process for Continuous Improvement, our customers will be provided with the highest standard of quality products, service and support.

To ensure our Quality Management Program is meeting all of the ISO 9001:2000 Guidelines, we have an annual Third Party Periodic Assessment performed by a Lead Auditor of AKG & Associates.

We believe our new Quality Management Program will continue to support Our Quality Policy Statement and provide the Customer Satisfaction you expect of an ISO 9001:2000 Registered Program.
